

UNUS #99-D535-EDG
Case No. C6566(C)

REMARKS

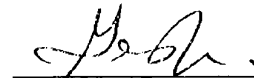

Reconsideration of the application, as amended, is respectfully requested.

The claims have been amended to make it clearer that the package to which the presently defined invention pertains is polymeric rather than glass. Although the present invention is disclosed as working for glass as well, as mentioned in the second full paragraph of page 25 the package of the invention is preferably a polymeric bottle.

The Office points to no teaching in Taylor et al. that their invention should be used for containers which are polymeric rather than glass. Therefore, Taylor et al. does not appear to teach the present invention. Nor does WO 97/26315's teaching of f-dyes in a liquid cleaning composition make up for the deficiencies of Taylor et al.

In view of the foregoing, it is respectfully requested that the application, as amended, be allowed.

Respectfully submitted,

Gerard J. McGowan, Jr.
Attorney for Applicant(s)
